## 

Name:

Mr. Green took his class out to survey how many cylinders they saw in different areas around their school.

= 5 cylinders

| Pharmacy | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Grocery Store | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Ruins | $\square$ | $\square$ | $\square$ |  |  |  |  |
| Candy Store | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |  |  |
| Gym | $\square$ |  |  |  |  |  |  |
| Park | $\square$ | $\square$ |  |  |  |  |  |

1. Where was the most common place to find cylinders?

How many were there?
2. Where was the least common place to find cylinders?

How many were there?
3. How many cylinders were seen in total?
4. How many more cylinders were found in the Grocery Store than in the Park?
5. If you combine the total cylinders from the Candy Store and the Pharmacy, how many are there altogether?
