Name_____ Date_____

## Read the following text and answer the questions

The most common symptoms of people infected with COVID19 are fever, dry cough and tiredness.

Other less common symptoms are discomfort and pain, sore throat, diarrhea, conjunctivitis, headache, loss of sense of smell or taste, and rashes.

Some of the serious symptoms are shortness of breath , chest pain or pressure, and inability to talk or move.

If you have severe symptoms, seek immediate medical attention before it's too late.

In case of mild symptoms, it is recommended to stay confined at home for those people that have no underlying conditions.

On average, people who become infected start to develop symptoms within 5 to 6 days of becoming infected, but it can take up to 14 days before they start developing symptoms of the infection.
